BIO BOTTLES MADE IN THE NETHERLANDS

Tacx BIO BOTTLES MADE IN *THE NETHERLANDS*

Tacx Are you looking for a bottle fully made of biodegradable materials? Then the Bio-Bottle of Tacx is a great choice. It stands out because the plastic of the bottle is biodegradable. Adding a small amount of bio-material changes the molecular structure so the material finally breaks up in biogas and biomass. This feeds the soil and it's completely absorbed by nature. The process of disintegration starts when the bottle ends up at a microbiological environment (compost heap, waste disposal).

WHAT IS UVC GERMICIDAL LIGHT?

UVC wavelengths are between 250 and 280 nanometers, making them germicidal – meaning they are capable of inactivating microorganisms, such as bacteria, viruses and protozoa.

HOW DOES UVC LIGHT WORK ?

The high energy from short wavelength UVC light damages the DNA of bacteria and viruses thereby preventing replication and ability to infect.

OUR UVC DISINFECTION PRODUCT RANGE

All our UVC products are mercury free and hence environmental friendly. Our products have been tested to be effective in disinfecting 99.9% bacteria such as E. Coli and Staphylococcus.

BIO BOTTLES MADE IN THE NETHERLANDS

Tacx BIO BOTTLES MADE IN *THE NETHERLANDS*

Tacx Are you looking for a bottle fully made of biodegradable materials? Then the Bio-Bottle of Tacx is a great choice. It stands out because the plastic of the bottle is biodegradable. Adding a small amount of bio-material changes the molecular structure so the material finally breaks up in biogas and biomass. This feeds the soil and it's completely absorbed by nature. The process of disintegration starts when the bottle ends up at a microbiological environment (compost heap, waste disposal).

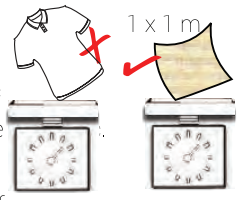
GSM or GMS ?



Most manufacturers confuse clients with this. GSM: Grammes per sq. meter is the wt. of the fabric in a square of 1 meter x 1 meter.it remains the same in all sizes. Hence the correct way to describe it. GMS: is the wt. in grammes per piece of the Tee/Polo And will always vary with each size. Thus, completely misleading. We ALWAYS specify the GSM. So you are rest assured of what we offer.

Heavier the better ?

Not necessarily. The quality of yarn will decide the quality and Price. Super combed, combed, semi combed and carded: this is the quality of YARN in descending order. We specify the yarn. So you are rest assured of what we offer.

What more we can offer:

You Are Welcome To Send Your Design Ideas And Originals. We Will Reproduce It For You..!

"ORCA is found in Antarctica and Arctic oceans. Also called ' Killer Whales', it is the largest of the Dolphin family. They are beautiful, intelligent, fast, strong and yet the most social of all sea animals! They are said to have great tolerance in varying temperatures. That is the reason they enjoy world-wide distribution. Most interestingly, it's the only species in the world that has both the male and the female offspring stay with their mothers and immediate family forever...!

These wonderful creatures have inspired us to bring to you exclusive polos. Their 'killer look', beauty, sheen and lustre is attributed to the MERCERIZING process. The premium cotton rich material makes it extremely comfortable in all climatic conditions. The collar, cuff in the birdie configuration sets new standards in their making. The bold loop stitches all over the hems and shoulder make them unique and yet resilient. Finally just as the ORCA, this polo will stay with you for long time to come.

Shouldn't then it be called the ORCA POLO?"

Pierre Cardin
PARIS

Legendary French designer, fashion designer and innovator Pierre Cardin. As a graduated architect he started his career of fashion designer after the Second World War under the guidance of a renowned master in the field, Mr Christian Dior.

In 1950 he sets up his own fashion saloon and in 1953 he becomes a member of the presitigious French association Chambre Syndicale de la Haute Couture. In 1959 he starts a revolution in the field by creating a first collection in history directly produced for the sale and wearing "prêt-à porter". In this way he brings high fashion to the general public.

Besides textiles and accessories Pierre Cardin designs furniture, interiors, objects of applied arts & has also worked for automobile and aircraft industry and in other areas.

Since 1991 Pierre Cardin has held the position of honorary ambassador of UNESCO and since 2009 he has been a good will envoy of the FAO of the United Nations.

Pierre Cardin has received a number of awards and decorations of high degree from institutions all over the world. Since 1977 he has several times been given De d' Or" (golden thimble), the largest honor of French haute culture. Pierre Cardin was the first fashion designer in history to win, in 1992, a chair in the French Academy of Fine Arts (Academie des Beaux-Arts).

The collection of original Pierre Cardin products has been carefully produced from selected materials and created with the emphasis on detail and attractive design.

History shows that Pierre Cardin is not only a fashion trademark, he is also a symbol of timelessness.

Guilloché

The origins of this engraving procedure, developed in the 17th century, trace back to the classical jewellery industry. Otto Hutt is one of the few companies that still uses this sophisticated technique. Not only has Otto Hutt continued this precision process manually, but they've developed it even further, adding innovative CNC control.

To ensure sustainable development, an important aspect for us is to take a holistic view of the three components: economics, environment and society. In collaboration with Climate Partner, our site in Fischerbach is 100 % climate-neutral – this includes the processing of all uma pens. The unavoidable emissions are compensated through climate protection projects. We consciously focus on investing in our region. The forest protection project in Freiburg aims to protect our valuable rural environment.

Facts:

- Emissions of 2,636,777 kg CO_2 compensated to date
- 100 % climate-neutral processing in Fischerbach
- 25 product series manufactured, processed and delivered climate-neutrally

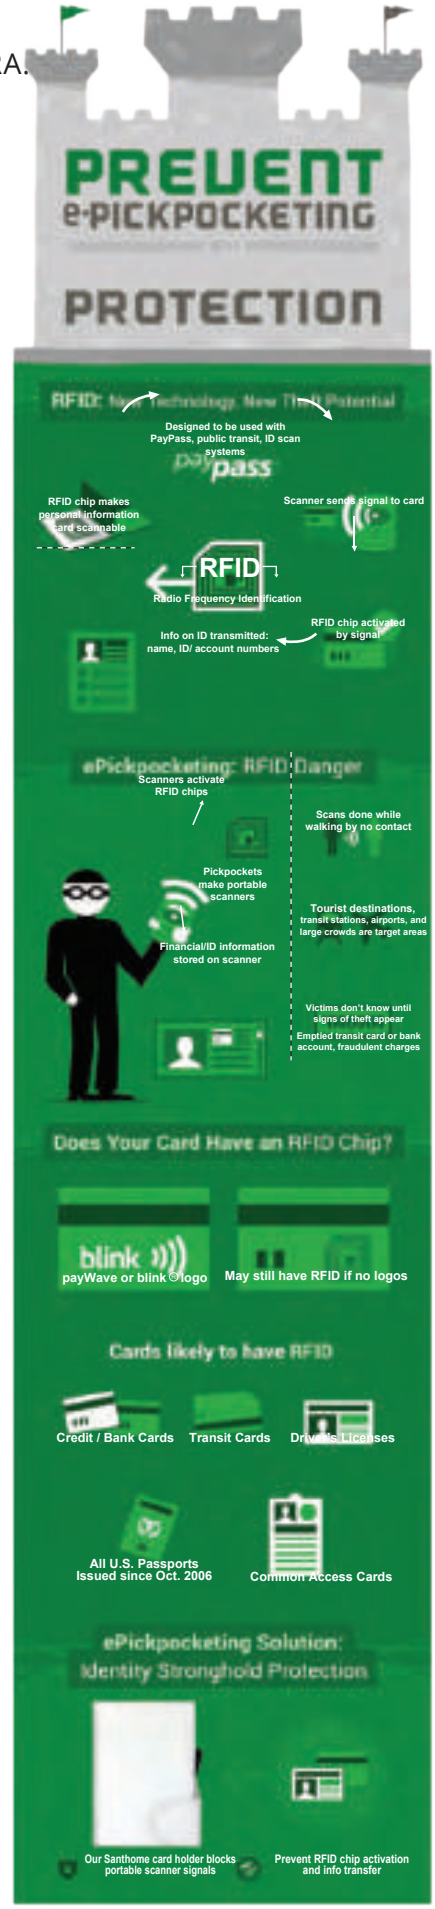
PRESENTING A WALLET
THAT PROTECTS AGAINST FRAUD IN THE NEW WI-FI ERA.

SANTHOME

SECURITY FOR YOU



How the card holder protects?

The aluminium Cardprotector protects your most important plastic cards not only against bending and breaking, but also against malicious parties reading your RFID and NFC cards. RFID (Radio Freqency IDentification) cards contain a chip and an antenna for wireless communication. Examples of RFID cards include the Travel card, ID cards, the latest generation of credit cards and bank cards, as well as various access passes.

Using the Cardprotector

The Cardprotector can hold a maximum of 7 cards. If only embossed cards are used, the capacity is 5 cards. Position the cards you use the most at the back or front and they will slide out sufficiently to be used. Slide out the cards with ONE movement of the slider on the side. The radio signal, although still greatly reduced, will now be sufficient for contact over a short distance. This means that you can use your RFID-NFC cards easily and securely. After use, slide your cards back into the Cardholder by pressing down on them lightly.

PRESENTING A WALLET
THAT PROTECTS AGAINST FRAUD IN THE NEW WI-FI ERA.

RFID BLOCKING

How the card holder protects?

The aluminium Cardprotector protects your most important plastic cards not only against bending and breaking, but also against malicious parties reading your RFID and NFC cards. RFID (Radio Freqency IDentification) cards contain a chip and an antenna for wireless communication. Examples of RFID cards include the Travel card, ID cards, the latest generation of credit cards and bank cards, as well as various access passes.

Using the Cardprotector

The Cardprotector can hold a maximum of 7 cards. If only embossed cards are used, the capacity is 5 cards. Position the cards you use the most at the back or front and they will slide out sufficiently to be used. Slide out the cards with ONE movement of the slider on the side. The radio signal, although still greatly reduced, will now be sufficient for contact over a short distance. This means that you can use your RFID-NFC cards easily and securely. After use, slide your cards back into the Cardholder by pressing down on them lightly.
